

**Senior Investigator (Clinical)**  
**Vaccine Research Center**  
**National Institute of Allergy and Infectious Diseases**  
**National Institutes of Health**  
**Department of Health and Human Services**

The National Institute of Allergy and Infectious Diseases (NIAID), Vaccine Research Center (VRC) is seeking an outstanding physician scientist for a tenure-eligible position to carry out an independent clinical program supporting vaccine and monoclonal antibody (mAb) research and development (R&D). The selected candidate is expected to direct a vigorous research program focused on assessing questions related to vaccine-induced human immunology and development of mAbs for prevention of infectious diseases. The overall portfolio will be focused on prevention and treatment of HIV, influenza, malaria, tuberculosis (TB), Ebola, Marburg, Nipah, coronavirus, and other emerging and re-emerging infectious diseases.

Candidates must hold an M.D. or equivalent doctoral degree and have the relevant clinical research and regulatory experience necessary to design and direct the conduct of clinical trials, pushing promising vaccine candidates from scientific discovery to tangible products for prevention of infectious diseases. Applicants should also have a strong publication record demonstrating an ability to perform independent, high-quality, creative, and impactful research in the fields of vaccine product development and human immunology. The ideal candidate will have expertise in the design and implementation of clinical research protocols with data generation and analysis resulting in publication and international presentation. The ideal candidate should also have knowledge of regulatory compliance requirements and experience in developing strategic public-private collaborations to drive both early-stage and advanced clinical development of novel vaccine candidates.

The incumbent will have access to state-of-the-art core research support at the National Institutes of Health (NIH), including within the Clinical Center, a premier research hospital on the main NIH campus. Candidates will be assigned independent resources including support personnel, equipment, space, and an allocated annual budget for services, supplies, and salaries sufficient to foster success.

Salary is commensurate with experience and accomplishments. A full package of benefits (including retirement and health, life, and long-term care insurance) is available. The position is subject to a background check. Appointees may be US citizens or resident aliens. Applications from women, persons from underrepresented groups in biomedical research, and persons with disabilities are strongly encouraged.

### **To Apply**

Visit [USAJobs.gov](https://USAJobs.gov) and access the detailed Senior Investigator vacancy announcement [NIH-NIAID-DH-22-11342513](#), open **April 13 – 22, 2022**.

- Federal agencies may request information regarding the vaccination status of selected applicants for the purposes of implementing other workplace safety protocols, such as protocols related to masking, physical distancing, testing, travel, and quarantine. Employees providing healthcare or services in support of healthcare (Healthcare Workforce) may be required to receive a COVID-19 vaccine because they are expected to perform duties that put them in contact or potential contact with patients. We may request COVID-19 vaccination, and other vaccination documentation from Healthcare Workforce personnel at any point during the onboarding process or at any time during your employment with NIH.
- Due to COVID-19, we are currently in a maximum telework state. If selected, you may be expected to telework upon your appointment. As employees are permitted to return to the office, you may be required to report to the duty station listed on this announcement, even if your home/temporary telework site is located outside the local commuting area.
