

Chief Executive Officer

WittKieffer is honored to partner with Marin Community Clinics in launching a national search to recruit their next Chief Executive Officer. MCC is the largest not-for-profit federally qualified community health center in Marin County and they provide comprehensive, high-quality primary health care to 38,000 individuals in need annually. As a Federally Qualified Health Center, MCC serves patients from all walks of life regardless of their income, insurance, or immigration status. Marin County is a unique environment and MCC's service area consists of pockets of impoverished residents dispersed within surrounding areas of tremendous wealth. Nearly one out of every five Marin residents are MCC patients.

MCC has grown into a 21st-century provider with modern facilities, expert-paid physicians and nurses, the latest technology, and sophisticated diagnostic, treatment and prevention programs. They employ over 590 staff, with a budget of \$75 million, projecting more than 230,000 clinical visits in the upcoming year. MCC operates eight medical clinics and provides a full range of primary health care, as well as dentistry, behavioral health, obstetrics & gynecology, family planning, optometry, chiropractic, and several specialty services. Plans for MCC include continuing to expand tele-health services, further expansion of dental services, more specialized care for older adults and greater mental and behavioral health resources.

MCC's new CEO will work closely with the Board of Directors to set the strategic vision for the health center, ensure sound financial operations, oversee program development and empower staff by encouraging a supportive, inclusive, and engaging culture. Especially important, MCC is seeking a leader who will enhance the Clinic's ability to raise funds and play an active role in identifying, stewarding, and soliciting donors. Recruiting and staff retention are high priorities and the CEO must focus on staff development, enabling all to see a career path, while fostering a community that inspires and empowers each of its members to achieve their full potential.

A minimum of ten years of progressive leadership in a complex, multi-functional, mission-oriented organization with a diverse portfolio is needed. Senior-level executive experience in a FQHC, community health center, primary care facility, not-for-profit healthcare, or human services organization will be considered. Candidates should possess senior management level experience leading a multi-site operation and multi-disciplinary teams. The salary range for this position is \$375,000 - \$425,000.
